Exhibitor profile:

PromoTron Solutions Ltd. was established with the goal to become one of Europe's leading suppliers of software solutions for the promotional industry, considering 3D visualizations. The company's research and software development department has developed unique software for companies enterprising in the promotional industry. This software solutions significantly reduces production time and simplifies the whole process of order's execution and printing.

Our main mission is to create and improve revolutionary online tools, services, and high-quality data for companies operating in the promotional and advertising industry. Our software solutions will open the door to a multitude of new creative opportunities for their customers, bringing to the companies enterprising in the promotional goods production many opportunities to acquire new clients and impress their existing customers. We want to create software that will increase productivity, reduce costs, boost B2B and B2C e-commerce and marketing. But first of all, our software tools will open new opportunities and horizons for their business. We will enable them to make branding in a revolutionary way, using an optional package of technologies to quickly obtain accurate visualizations, online proofs, use of our ready-made e-shops and choose from millions of promotional items, including their color optimization - simply and online.

Our team of professionals has more than 20 years of experience in the field of printing and production of promotional goods This knowledge has been fully utilized in the development of our products. In the future, we want to enrich our software portfolio with additional features to create a global platform, usable for all promotional, printing, advertising and branding activities. Our pilot software services are the TronLogo, the TronDesigner, and the TronShop.

TronLogo is a comfortable tool for branding, automated logo visualization and graphics simply and online on thousands of 15 major EU suppliers' promotional items. This software tool is easy implementable into your e-shop or website. Your clients will instantly see the final shape of their logo in 3D and real colors. TronLogo will automatically process print data within a few seconds, so you will no longer have to send your data for processing elsewhere.

The TronDesigner software allows you and to your customers to create new color designs of various promotional items directly in your e-shop without signing in anywhere else. The TronDesigner is capable to work with a full range of color spectrum and realistically project it on an item in the interactive 3D environment. For our clients, we will design 3D interactive models of their products with interactive features and animations.

TronShop is an e-shop platform specially created for selling of promotional items. Within a few clicks, you get the fully-prepared online e-shop with the possibility of individual specifications and extensions, products, and services. Clients will be able to buy the goods directly from you. In combination with other PromoTron software tools, the TronShop will become a revolution in branding, as your customers will be able to buy goods, place their logo on it and choose its color directly on your site.
